Re: Reference for GSS Electric

To Whom it May Concern:

We are pleased to recommend Geof Gratny and GSS Electric. My wife and I just completed a 5000 square foot post-and-beam home in Whitefish. GSS Electric was hired to do all of the electrical.

We found GSS to be very professional. They were dressed neatly, arrived on time, and were pleasant and courteous. They were efficient and extremely knowledgeable. Our level of trust was such that we came to depend a great deal on their opinions and advice. We also noticed that they worked very well with all of our other subcontractors.

Geof and his electricians did some highly technical items for us in addition to the usual light fixtures: a cable lighting system for the kitchen, a security system, a de-icing system, and audio/video. They also worked closely with our lighting subcontractor which helped a lot.

Geof was very good at communicating with us too, either by e-mail, text message or a telephone call. We knew we could reach him with questions just about any time. That meant a lot to us.

GSS Electric takes great pride in their workmanship. It shows in the quality of what they have done in our home. Geof kept to the contract price in all respects even though some of our light fixtures were more complicated to put together than originally anticipated, and they took more time because they wanted to do the job right.

You won't find a more professional, experienced and trustworthy contractor. Should you have any questions, please do not hesitate to contact us.

Sincerely,

PHILIP L. CARDAN, M.D.
