

NORTHVIEW  
CONSTRUCTION INC.

August 8, 2011

To whom it may concern:

GSS Electric was recently contracted by Northview Construction to a 59,000 sq ft 13 week design-build live grocery store remodel. I was the point of contact between the owner, store and contractors and responsible for coordination of the project.

The first hurdle in this project was field engineering the electrical for new equipment and design changes. GSS proved competent in their design abilities while maintaining our bottom line.

This work was performed at night so the following morning the store must be in clean orderly condition with equipment back online to resume retail sales. There are many deadlines in a phased project of this size and turnovers for individual department merchandising must be on time. GSS was on time in all project turnovers including an instance where they had to rewire owner provided equipment at the last minute to keep us on schedule.

These projects demand a high level of professionalism, cleanliness, commitment and flexibility to satisfy a continually evolving scope of work and I am pleased to say that GSS Electric exceeded the standard.

Please feel free to contact me with any additional questions.
