

Hey Geof

I just wanted to let you know that I've enjoyed working with you and GSS Electric throughout the summer of 2010. You took on a very big job, re-wiring my older home so that we could add a heat pump, and installing hundreds of feet of heat tape in all the critical areas. And then to install a generator on top of all that! But now it's all done and we're ready for winter. I feel more confident than ever before!

I appreciated your always-prompt responses to my inquiries and your attention to detail. Not only are you a very competent electrician, but you have a fun and charming personality that makes it a joy to work with you. You left no-stone-unturned when it came to finding out the answers to ALL of my questions, and you never once complained or acted 'put out' about doing it. I felt respected and appreciated which - as a woman - is certainly NOT always the case when I hire contractors to work for me.

I feel a huge sense of relief now, not only due to the work you've done for me, but in knowing that you guarantee your work and will always be there when I need anything electrical in the future. Thank you for a very positive working experience, I will certainly recommend GSS Electric, Inc to everyone I know in the area.
